PROFESSIONAL SUMMARY

Registered nurse with four years of experience providing comprehensive patient care to patients at critical access hospital primarily on a labor, delivery, recovery, and postpartum unit. Skilled in assessment, patient education, care coordination and collaboration with interdisciplinary healthcare teams to deliver safe and high quality care. Experienced in caring for patients in various age groups and demographics and adapting to diverse clinical environments. Recognized for strong communication, critical thinking, and organizational skills in fast paced and frequently evolving settings. I am hoping to use my clinical expertise and patient centered approach in an outpatient clinic role focused on continuity of care, patient education, and improved patient outcomes through detail oriented assessment.

WORK & CLINICAL EXPERIENCE

LIVINGSTON HEALTHCARE – Family Birth Center | Jan 2023 – Present Livingston, MT Registered Nurse |

- Provided exemplary care for patients throughout pregnancy, labor, delivery, postpartum, recovery, and pre/post-surgical status
- Coordinated patient care between multiple departments and providers to ensure patient safety
- Provided stabilizing care and managed transport of critical patients to outside facilities
- Utilized nursing experience to guide patients through normal newborn and pregnancy complications over the phone – appropriately identifying when in person care was necessary
- Demonstrated leadership by training other registered nurses on unit policies and procedures
- Assisted in hosting prenatal education classes where I would appropriately educate expectant parents about the labor and delivery journey to decrease apprehension and increase confidence
- Advocated for patients throughout their hospital stay to promote patient autonomy and safety
- Promptly communicated changes in patient status to various members of the care team to be prepared for evolving patient care and potential acute interventions
- Used therapeutic communication while managing complications to decrease patient trauma

LIVINGSTON HEALTHCARE – Medical Surgical Unit | Aug 2022 – January 2023 Livingston, MT Registered Nurse |

- Provided comprehensive care for patients with a range of conditions including diabetes, cardiac issues, respiratory illnesses and post-surgical recovery
- Recorded patient vital signs and medical information to track health progress
- Conducted comprehensive physical exams and provided throughout documentation
- Frequently assessed how different methods of patient evaluation, care plans, and treatments were working for patients
- Adhered to HIPPA guidelines ensuring confidentiality and security of patient health information
- Worked as part of a team to provide safe and efficient care for a busy unit
- Closely monitored patients facing complex medical crisis and managed their medications, treatments, testing, and therapies to promote a healing environment

CLEVELAND CLINIC – various departments Cleveland, OH Nursing Student | Jan 2021 – May 2022

- Performed direct patient care through over 740 hours of clinical experience
- Used nursing judgment to prioritize tasks
- Created comprehensive care plans for a variety of patient types
- Developed skills necessary to recognize acute medical issues and promptly intervene
- Documented all care tasks within EMR system

EVOLVED MEDICAL HEALTH

Walnut Creek, CA
Medical Assistant | June 2018 – Nov 2021

- Performed direct patient care to reduce the physicians in office tasks
- Managed the office schedule and ensured clinic was always properly stocked and supplied

ALABAMA PRISON BIRTH PROJECT

Auburn, AL
Intern & Volunteer Coordinator | Jan – May 2018

- Facilitate group education & support for pregnant and post-partum incarcerated women
- Developed and coordinated community outreach projects and fundraising efforts

RSVP OBGYN

Walnut Creek, CA
Student Externship | July – August 2016

- Assisted nurses & physicians with appointments, charting & procedures
